

Texas Emergency Medical Task Force

Position Description: TX EMTF Medical Gas Technician

POSITION DESCRIPTIONS: Texas Emergency Medical Task Force (TX EMTF) Medical Gas Technician

Reports to:

The Medical Gas Team reports directly to the Ambulance Staging's Logistics Team Leader.

Supervises:

None.

Position Specific Requirements:

The Medical Gas Team is responsible for coordinating requests, acquisition and delivery of medical gases (primarily oxygen) for all units in the Staging Area. During larger, extended incidents, units that return to the Ambulance Staging Area at night will have the opportunity to draw necessary supplies and refill on board and portable oxygen cylinders to meet patient demand. The Medical Gas Team will maintain a minimal supply of replacement tanks, regulators and supplies to replace any malfunctioning oxygen equipment.

Qualifications and Skills:

- + ICS 100, 200, 700
- + Hold current certification as an Emergency Medical Technician
- + Hold a valid driver's license and have experience operating All-Terrain vehicles
- + Preferred: (not required) TX EMTF ASMT and or ASTL course completion

Assigned Duties:

- + Establishing on-site exchange procedures for medical gas
- + Requesting and tracking oxygen use during the incident
- + Developing and maintaining an accountability system for all spare tanks and regulators
- + Handling security of medical gas dispensing site
- + Preparing equipment and supplies for return upon demobilization
- + Follows Company Policy and Vendor Contract with DSHS's Medical Operation Center and or the Texas State Operations Center agreements
